

OBJECT: EuroBioHighTech 2020 – Participation Proposal

Dear Sirs,

Today, more than ever, it is crucial to take advantage of opportunities, which help a company to grow and expand its products and projects to a national or even international level. The emergency which we faced and we are still facing, has significantly decreased the networking opportunities: for example, Meet in Italy, an event organized by the National Cluster Alisei, which works in the Health sector, has been delayed to May 2021 due to the Covid-19 emergency.

Therefore, it is our pleasure to announce that the EuroBioHighTech 2020 (briefly EBHT 2020) will take place in an innovative manner. The organization is carried on by BioHighTech NET 4.0 Network and Confindustria Alto Adriatico, in collaboration with Chamber of Commerce Venezia Giulia (Aries) and Center of Molecular Biomedicine (CBM).

This year, our event will carry an unique role: EBHT 2020 will be the only event of the year fully dedicated to Innovation and Smart Health and it will be accredited as the Satellite Event of Euroscience Open Forum (briefly ESOF 2020). In fact, EBHT will take place the 3rd and 4th September 2020, concurrently with ESOF 2020 and it will be located in Porto Vecchio of Trieste, by the Centrale Idrodinamica (Hydrodynamic Power Plant), in front of Magazzino 27, the entrance of ESOF 2020.

EBHT 2020 constitutes a unique opportunity for our businesses, in terms of presence and visibility. During congress sessions the enterprises will showcase their own research and development projects. These projects, financed at an European, national, regional and transboundary level, are being carried out with the involvement of Universities, Research Entities, Hospitals and other territorial socio-healthcare entities.

Our plenary sessions will be focused on Research, Education, Finance and Policy of Innovation for Health. Exactly due to these chosen themes, we were given the recognition of Satellite Event of ESOF 2020.

The news and opportunities do not end here: Trieste Valley, one of the companies in our network, is installing a Cloud Data Center, which will be operating during ESOF 2020 and will distribute services of High Performance Computing and Artificial Intelligence to companies of the territory, operating in the health field, but also in other industrial sectors. With this Cloud Data Center, it will be possible to participate to EBHT 2020 in two ways at the same time: both physical and virtual, thanks to a new platform.

ORGANIZERS

Main business network in FVG region in biomed, biotech and bioinformatics

It is the first time that our manifestation is making use of such advanced computer technologies.

This platform will contribute to overcome all time and physical barriers and will endorse access to a national and international audience, allowing to extend our event until the 11th September 2020, thus increasing visibility of public and private entities, which will participate.

The chances to develop business and scientific relationships will be implemented by one-to-one meetings, approached in various ways and with personalized schedules, in accordance to your demands and those of your interlocutors.

It will be possible to view the presentations of the companies and their projects through streaming and live sessions.

All the activities will be supported by an innovative campaign of digital marketing, which has been created specifically for this event.

In order for you to grab this opportunity, we would like to highlight that the admission fee for the virtual and physical participation is € 1.400 per participant, while for the virtual participation only, the admission fee is € 700.

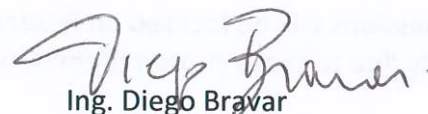

The adherence for the physical and virtual participation will be accepted latest on the 7th August 2020, while virtual participation only adherences will be accepted latest 26th August 2020.

To the first 50 registered entities, an entrance ticket for ESOF 2020 will be offered, as well as the access to the ESOF 2020 virtual platform, for the whole period of five days, from the 2nd to the 6th September 2020.

We are certain that you will catch this opportunity promptly.

It is sufficient to compile the module attached, complete with regulations and to subscribe it.

Best regards,

Ing. Diego Bravar

President of the Organizing Committee
